

Rental Jacket with Protection

Especially for “**heavy duty**” circumstances like the **rental-tracks**, Arroxx developed a Rental Jacket with Protection made out of Cordura. Easy for your customers; no struggling with suits, just put on your jacket and look like a professional driver. This Jacket has proven to be real **Value for Money!**

The fabric is equal to the fabric of the homologated suits and guarantees you a maximum **lifespan** at **reasonable costs**. The **rental-zipper**, normally used in tents, has a lifetime of 10 years and 1 year is guaranteed for rental purposes. **Elastic rib** at the waist and the wrists of the jacket ensures a **comfortable closure** at the body.

Besides all these benefits this jacket has also padding for **protection against injury at the following areas:**

- **Elbows** to protect against the engine.
- **Back and ribs** to protect against the seat.

This jacket can also be customized. All above mentioned items can be changed and other requirements can be produced on your demand.
